Dear Hiring Team at App Tailors,

I'm Prince Kyeremanteng, founder and lead software engineer at PKay Software Consultancy, and I'm excited to express interest in the Python Developer role at your company. With hands-on experience building scalable backend systems and leading development teams, I bring a strong track record of writing clean, maintainable code and delivering production-ready solutions.

My core stack includes Python, Django, Django REST Framework, PostgreSQL, and Redis, with a strong focus on API development and real-time applications using Django Channels and WebSockets. I've successfully built systems ranging from a destination experience app with chat and push notifications, to a strategic M&E platform for the University of Ghana, and payment solutions for PayHub Ghana Limited.

Beyond implementation, I regularly engage in code reviews, mentor team members, and ensure that engineering best practices are followed across projects. I'm passionate about crafting robust software that solves real-world problems efficiently.

I'd love the opportunity to bring my experience and enthusiasm to the App Tailors team. Thank you for considering my application.

Warm regards,  
Prince Samuel Kyeremanteng  
Founder & Lead Software Engineer
