

EDUCATION

Lund University, Sweden	Lund, Sweden
Exchange Program; Master’s in Computer Science	Jan – Jun 2026
University of Ghana, Ghana	Accra, Ghana
Master’s in Computer Science; CGPA 3.75/4.0	Oct 2024 – Oct 2026
University of Ghana, Ghana	Accra, Ghana
Bachelor’s in Computer Science; CGPA 3.45/4.0	Oct 2019 – Aug 2023

SKILLS SUMMARY

Languages:	Python, SQL, JavaScript, Dart, HTML
Frameworks:	Django, FastAPI, Flutter, PyTorch, TensorFlow, ScikitLearn
Tools:	Git, Postman, PostgreSQL, PgAdmin, LLM, Agentic AI, Docker, REST API
Platforms:	GitHub, Jupyter Notebook, VSCode, Codex, DigitalOcean, Linux Servers
Soft Skills:	Rapport Building, Team Playing, People Management, Excellent Communication

WORK EXPERIENCE

Lead Software Engineer AfriLearnTech Ghana Limited	September 2025 – Present
- Led the development of a national digital learning platform for Liberia’s Ministry of Education. - System includes LLM Agents for course content generation to augment localized content. - System includes (synchronizable) offline boxes to be deployed in schools with low connectivity.	
Founder PKay Software Consultancy	October 2023 – Present
- Led the development of software systems, including web and mobile, for a wide range of clients. - Systems include Admission Systems, Accountability (Buddy) Systems, and Business Portals. - Handled stakeholder engagements and the entire Software Development Life Cycle.	
Software Developer PayHub Ghana Limited	April 2021 - December 2025
- Developed Payment Processing APIs for internal use and for clients. - Developed fintech-grade dashboards for transactions monitoring and management. - Reduced system latency through Redis-based caching and optimized session management.	

PROJECTS

Projection Software Link	April 2026
- Built a desktop church projection platform using Tauri, React, and SQLite. - Developed a real-time dual-window projection and display engine. - Engineered offline content management for scriptures, hymns, and announcements.	
AfriLearn Digital Learning Platform Link	Oct 2025 - April 2026
- Built an offline-first national digital learning platform for Liberia’s Ministry of Education. - System includes easy-to-deploy hardware ‘boxes’ deployable in low connectivity areas. - Automatic updation and synchronization of educational content (videos, Audio, PDFs, etc.). - Uses LLM to suggest and generate personalized lessons and assessments for learners.	

APanel Cloud Deployment Platform

April 2026

- Built a VPS deployment dashboard for apps, servers, env variables, pipelines, and live logs.
- Added GitHub repo import, source uploads, OAuth callback, and server onboarding flows.
- Connected backend metrics, deployment log hydration, and WebSocket event ingestion.
- Orchestrated setup for packages, DB, domains, SSL, service restarts, and health checks.

Synther | [Link](#)

April 2026

- A synthetic data generation tool for generating highly configurable datasets
- Implemented Celery workers and Redis for scalable background generation and live progress.
- Designed an intuitive wizard with datatype-aware fields, options, and downloads.
- Ensured data fidelity with numpy/Faker-based generators, and deterministic seeding.

Nrf24 Firewall FullStack and Embedded | [Link](#)

March – April 2026

- Designed/implemented a lightweight software-defined firewall for an NRF24-based IP network.
- Built a full-stack system using FastAPI and React with a staged rule engine and web interface.
- Configured Linux TUN interfaces, routing, NAT, and integrated nftables for traffic filtering.
- Evaluated system performance using UDP throughput and latency measurements with iperf3.

ReviewMate | [Link](#)

November 2025

- Designed and built a Word add-in with an LLM-powered review agent (TypeScript, Office.js).
- Designed prompt-driven review workflows to generate structured, actionable feedback as review comments in Word.
- Integrated OpenAI-compatible LLM pipeline with JSON outputs and resilient parsing.
- Added AI writing tools (trim, paraphrase, summaries) with secure API key handling.

Admissions Management System | [Link](#)

January 2024 – Present

- Designed/developed an admissions management system for [GIMPA](#) (a tertiary institute in Ghana)
- The system includes a management portal for monitoring and management, with an automated and manual notification system.
- Over 2000 applications processed so far, and counting.
- Application processing time is improved by over 500 percent.

Online Market Place (Oysloe Online Marketplace) | [Link](#)

October – December 2025

- Built an online marketplace platform for a client for connecting buyers with sellers.
- System includes mobile apps on both PlayStore and AppStore.
- Implemented a chatting feature using websockets and channels, and Integrated payments.
- System has a dashboard for administrative monitoring and management.
