## EDUCATION

|                                                |                             |
|------------------------------------------------|-----------------------------|
| <b>Lund University, Sweden</b>                 | Lund, Sweden                |
| Exchange Program; Master's in Computer Science | <b>Jan – Jun 2026</b>       |
| <b>University of Ghana, Ghana</b>              | Accra, Ghana                |
| Master's in Computer Science; CGPA 3.75/4.0    | <b>Oct 2024 – July 2026</b> |
| <b>University of Ghana, Ghana</b>              | Accra, Ghana                |
| Bachelor's in Computer Science; CGPA 3.45/4.0  | <b>Oct 2019 – Aug 2023</b>  |

---

## SKILLS SUMMARY

|                       |                                                                              |
|-----------------------|------------------------------------------------------------------------------|
| • <b>Languages:</b>   | Python, SQL, JavaScript, Dart, HTML, CSS, Tailwind                           |
| • <b>Frameworks:</b>  | Django, FastAPI, Flutter, PyTorch, TensorFlow, ScikitLearn, React, Three.js  |
| • <b>Tools:</b>       | Git, Postman, PostgreSQL, PgAdmin, LLM, Agentic AI, Docker, REST API, Sentry |
| • <b>Platforms:</b>   | GitHub, Jupyter Notebook, VSCode, Codex, DigitalOcean, Linux, Git Actions    |
| • <b>Soft Skills:</b> | Rapport Building, Team Playing, People Management, Excellent Communication   |

---

## WORK EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                   |                                   |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------|
| <b>System Development Consultant   SILEX Consulting Limited</b>                                                                                                                                                                                                                                                                                                                                                   | <b>July 2025 - Present</b>        |
| <ul style="list-style-type: none"><li>• Led the development of ICCASA's Monitoring and Evaluation system.</li><li>• The system includes custom projects, indicators, outcomes, baselines, and forms for data collection. The system also includes tablet mobile apps for data collection by field agents.</li><li>• Automatic computations with custom formulae, with a comprehensive reporting system.</li></ul> |                                   |
| <b>Lead Software Engineer   AfriLearnTech Ghana Limited</b>                                                                                                                                                                                                                                                                                                                                                       | <b>September 2025 – Present</b>   |
| <ul style="list-style-type: none"><li>• Led the development of a national digital learning platform for Liberia's Ministry of Education.</li><li>• System includes LLM Agents for course content generation to augment localized content.</li><li>• System includes (synchronizable) offline boxes to be deployed in schools with low connectivity.</li></ul>                                                     |                                   |

## PROJECTS

### Holistic Modern M&E Software as a Service | [Demo Link](#)

- Developed core M&E workflows for projects, outcomes, indicators, versioned forms, field submissions, automated indicator computations, dashboards, and PDF reports.
- Implemented multi-tenant operations features, including role-based access, audit logs, file uploads, billing/subscriptions, Paystack payments, notifications, and background jobs.
- The system also includes tablet mobile apps for data collection by field agents.

### Projection Software | [Link](#)

April 2026

- Built a desktop church projection platform using Tauri, React, and SQLite.
- Developed a real-time dual-window projection and display engine.
- Engineered offline content management for scriptures, hymns, and announcements.

### AfriLearn Digital Learning Platform | [Link](#)

Oct 2025 - April 2026

- Built an offline-first national digital learning platform for Liberia's Ministry of Education.
- System includes easy-to-deploy hardware 'boxes' deployable in low connectivity areas.
- Automatic updation and synchronization of educational content (videos, Audio, PDFs, etc.).
- Uses LLM to suggest and generate personalized lessons and assessments for learners.

### APanel Cloud Deployment Platform

April 2026

- Built a VPS deployment dashboard for apps, servers, env variables, pipelines, and live logs.
- Added GitHub repo import, source uploads, OAuth callback, and server onboarding flows.
- Connected backend metrics, deployment log hydration, and WebSocket event ingestion.
- Orchestrated setup for packages, DB, domains, SSL, service restarts, and health checks.

### Synther | [Link](#)

April 2026

- A synthetic data generation tool for generating highly configurable datasets
- Implemented Celery workers and Redis for scalable background generation and live progress.
- Designed an intuitive wizard with datatype-aware fields, options, and downloads.
- Ensured data fidelity with numpy/Faker-based generators, and deterministic seeding.

### Nrf24 Firewall (FullStack and Embedded) | [Link](#)

March – April 2026

- Designed/implemented a lightweight software-defined firewall for an NRF24-based IP network.
- Built a full-stack system using FastAPI and React with a staged rule engine and web interface.
- Configured Linux TUN interfaces, routing, NAT, and integrated nftables for traffic filtering.
- Evaluated system performance using UDP throughput and latency measurements with iperf3.

### ReviewMate | [Link](#)

November 2025

- Designed and built a Word add-in with an LLM-powered review agent (TypeScript, Office.js).
- Designed prompt-driven review workflows to generate structured, actionable feedback as review comments in Word.
- Integrated OpenAI-compatible LLM pipeline with JSON outputs and resilient parsing.
- Added AI writing tools (trim, paraphrase, summaries) with secure API key handling.

### Admissions Management System | [Link](#)

January 2024 – Present

- Designed/developed an admissions management system for [GIMPA](#) (a tertiary institute in Ghana)
- The system includes a management portal for monitoring and management, with an automated and manual notification system.

- Over 2000 applications processed so far, and counting.
- Application processing time is improved by over 500 percent.

**Online Market Place (Oysloe Online Marketplace) | [Link](#)**

**October – December 2025**

- Built an online marketplace platform for a client for connecting buyers with sellers.
- System includes mobile apps on both PlayStore and AppStore.
- Implemented a chatting feature using websockets and channels, and Integrated payments.
- System has a dashboard for administrative monitoring and management.
